Summary

Software Engineer focused on React Native development, building performant and scalable mobile applications. Complemented by MERN stack experience, including backend API design, database integration, and end-to-end application development.

Skills

Languages: JavaScript, TypeScript

Frontend: React.js, React Native, Redux, HTML, CSS, Tailwind, Material UI

Backend: Node.js, Express.js

Database: MongoDB

Tools: Git, Postman, Android Studio, Xcode

APIs & Integrations: REST APIs, Stripe, CallKit, Socket.io, Firebase

Experience

Associate Software Engineer

Aug 2024 – Present

The NineHertz, Jaipur

- Developed cross-platform mobile applications, improving performance and user experience.
- Collaborated with cross-functional teams to deliver scalable, production-ready features.
- Integrated REST APIs and optimized frontend-backend data flow.
- Built reusable UI components to ensure consistency across devices.

Full Stack Developer Trainee

Feb 2024 – Jul 2024

Global IT Providers, Jaipur

- Built MERN stack applications with scalable backend architecture.
- Designed RESTful APIs to improve system integration and performance.
- Developed responsive user interfaces using React and Tailwind CSS.
- Managed MongoDB databases and optimized query performance.

Projects

GamerMeet

- Architected a gaming community platform enabling user discovery, real-time messaging, and group formation.
- Implemented swipe-based matching system to enhance engagement.
- Built real-time chat using Socket.io with efficient state synchronization.
- Designed RESTful services for authentication and scalable data handling.

MediDoctor

- Developed a healthcare platform for appointment scheduling and doctor-patient interaction.
- Integrated Stripe for secure payment processing.
- Implemented real-time booking and in-app audio/video communication.
- Enhanced security using biometric authentication.

Business Card Network (BCN)

- Built a networking solution with automated card scanning and data extraction.
- Enabled digital card management and export (PDF, CSV).

PocketAttorney

- Developed a networking platform for legal professionals.
- Built reusable UI components for scalability and maintainability.

StoryTimeAdventure

- Created an interactive storytelling platform with collaborative features.
- Implemented gamification and text-to-speech functionality.

HERS

- Designed a service marketplace with role-based workflows.
- Implemented booking and scheduling systems.

BestBathroomStops

- Built a location-based solution for finding reliable restroom facilities.
- Integrated geolocation APIs for real-time updates.

SoulMate

- Developed a matchmaking platform with swipe-based interaction.
- Implemented real-time chat and recommendation logic.

Bookify

- Built a reservation system with authentication and admin controls.
- Designed scalable backend services for booking workflows.

Feedin

- Developed a feedback platform with dynamic form creation.
- Built REST APIs for scalable data collection.

Education

Bachelor of Technology (Mechanical Engineering)

Rajasthan Technical University

CGPA: 8.56

2019 – 2023
